

After more than 30 years of research and development, Animat continues to seek ways to improve comfort and productivity by producing the highest quality rubber flooring that meets the specific requirements of today's livestock producers and all the technological advances in the industry today. Animat brings a high quality product to the market. Precision manufacturing techniques developed through years of research and development allows them to offer the producer the perfect solution for their facility.

Animat Slat Rubber

Animat slat rubber is a proven key component for the success of your building designs. Animat has the ability to cover any slat configuration with their expert drawing professionals and their precision water jet. Their team can provide quick and easy solutions for covering existing or new cattle confinement buildings with rubber flooring. The slatted rubber flooring is the perfect solution for your cattle facilities. This solution has never been more straightforward.

Maxgrip

The new Maxgrip has been designed specifically for slatted floor confinement facilities to improve traction and increase overall cattle performance. The Maxgrip mat has been designed to accomplish these goals and maintain the level of comfort that Animat provides for maximum performance of your cattle.

Picture shows the design and texture of the Maxgrip mat.

The maxgrip solid design improves traction in the working facilities. These mats can be custom cut to fit all areas; sorting pens, bud boxes, alleys, chutes and exit lanes. The Maxgrip solid will improve animal footing in all areas of your working facility.
